

VIJAY PUTTAREVAIAH

Software Engineer | Java · Spring Boot · Microservices · REST APIs · AWS

Halifax, NS | 902-452-2085 | vijayputtarevaiah@gmail.com | [linkedin.com/in/vijayputtarevaiah](https://www.linkedin.com/in/vijayputtarevaiah) | github.com/VijayPuttarevaiah

Available for Winter 2027 co-op, 4-month and 8-month terms | Eligible to work in Canada

Software Engineer with **3+ years** of software development experience and **5 years** of overall industry experience. Experienced across the **SDLC**, including technical design, backend development, **REST APIs**, troubleshooting, unit testing, and **Agile** delivery using **Java**, **Spring Boot**, **Docker**, **Kubernetes**, and **Jenkins** at **Wipro** and **Acuver Consulting**. Additional experience in **SQL**-based data analysis at **Amazon** and GenAI-integrated applications deployed on **AWS**. Skilled at solving complex problems and communicating technical solutions across cross-functional teams and stakeholders. Currently pursuing a **Master of Applied Computer Science** at **Dalhousie University**.

Technical Skills

Languages	Java, Python, TypeScript, JavaScript, SQL, HTML, CSS
Core CS	Object-Oriented Programming, Software Design Principles, System Design, Distributed Systems, Microservices, Cloud-Native Applications
Frameworks	Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Django, FastAPI Front end: React.js, Next.js, React Native
AI & LLM Tools	AWS Bedrock, Anthropic Claude API, Groq API, Google Cloud Vision, LLM Integration
APIs & Messaging	REST APIs, GraphQL, WebSockets, Webhooks, Apache Kafka
Cloud & DevOps	AWS, Docker, Kubernetes, Jenkins, CI/CD, Continuous Delivery, Terraform
Observability	CloudWatch, Grafana, Prometheus, Structured Logging
Databases	PostgreSQL, MySQL, MongoDB, DynamoDB, H2
Testing	JUnit 5, Mockito, Vitest, Pytest, Unit Testing, Integration Testing, End-to-End Testing, TDD
Practices	Agile/Scrum, Code Reviews, Sprint Demos, Full Software Development Lifecycle (SDLC)
Tools	Git, GitHub, GitLab, Bitbucket, Maven, Postman, Jira, Confluence

Professional Experience

Software Engineer | [Acuver Consulting Private Limited](#) Jan 2025 – Dec 2025

Project: [Smart Order Rerouting + DoorDash Full Service](#) | Client: [BJ's Wholesale Club](#) Jun 2025 – Dec 2025

- Designed and implemented a **Smart Order Rerouting** solution using **Java** and **Spring Boot** to automatically reroute orders between **DoorDash** and **Roadie** after last-minute vendor cancellations, reducing affected orders from **~10% to <1%**, preventing customer refunds and protecting millions in revenue.
- Raised **branch coverage** to **85%** and **line coverage** above **90%** by developing **JUnit 5** automated test suites integrated into **Jenkins** CI/CD pipelines and engineering configurable, per-club kill-switch logic for phased **production rollouts**.
- Led the **DoorDash Full Service** project, integrating Serviceability APIs to validate delivery coverage and automate reservation creation for direct pickup and delivery from BJ's club locations.
- Added error handling with fallback paths, **retry logic**, and **structured trace** and **debug logging** throughout the vendor integration flows, making failures easier to diagnose.
- Secured both integrations with **Spring Security** and **JWT** authentication.
- Documented the **VendorHub** backend through **JavaDocs**, **Postman** API collections, and **Confluence** technical design documents, leading technical walkthroughs and **stakeholder demos** to align implementation with system requirements.

Project: [Carrier Management Services \(CMS\) + Aekyam \(iPaaS\)](#) | Client: [Titan](#) Jan 2025 – May 2025

- Reduced new-carrier onboarding effort by **75%** by refactoring **Spring Boot CMS** carrier-specific logic using the **Strategy pattern** and implemented **Turnaround Time** APIs integrating **BlueDart**, **Criticalog**, and **Delhivery**.
- Developed a **webhook**-driven **Delhivery** integration for real-time shipment tracking and serviceability updates.
- Engineered and maintained an **ETL** data pipeline using **Aekyam** iPaaS to extract, validate, map, and transform **OMS** data across **8** carrier integrations, automating shipment creation through Waybill Generation APIs.
- Developed **React.js** components using **Redux** and **Hooks** for CMS and Aekyam, enabling real-time package tracking, carrier management, and pagination for the Aekyam **Audit Service** UI.

Software Engineer | [Wipro Limited](#)

Apr 2022 – Jul 2024

Project: [Integrated Scrubbing Modernization](#) | Client: [Oracle Cerner Corporation](#)

May 2022 – Jul 2024

- Designed a configurable **health-check service** monitoring **36+** services across Dockerized and non-Dockerized environments, with property-driven thresholds for service health, filesystem mounts, and disk capacity.
- Reduced infrastructure costs by **20%** by modernizing real-time **healthcare** claims scrubbing from **IBM BPM** to **Edifecs** platform, working hands-on to refactor scrubbing profiles and containerize the **Spring Boot** applications with **Docker**.
- Delivered **4** releases on schedule across **Development** and **Cert** by leading **Jenkins** and **Kubernetes** deployments and providing **third-level support** for **UAT** and **Production** issues.
- Cut post-release bugs by **25%** by raising code coverage to **85%** with **JUnit 5**, leading code reviews, debugging and performing root cause analysis on production issues, and estimating effort for design, coding, and testing tasks.
- Secured platform-to-**Edifecs** integration endpoints with **OAuth 2.0**.

Transaction Risk Investigator | Amazon

Sep 2020 – Apr 2022

Project: [A to Z Claims](#)

Sep 2020 – Apr 2022

- Analyzed fraudulent transaction patterns using **SQL** and communicated data-driven insights to stakeholders, contributing to a **30%** improvement in fraud detection accuracy.
- Participated in Amazon's **ATLAS** technical upskilling program and collaborated with senior managers, project managers, and **SMEs** to improve investigation **SOPs** based on operational insights and evolving processes.

Education

Master of Applied Computer Science | GPA: 3.88 / 4.30 (Current)

Jan 2026 – Apr 2027

Dalhousie University, Halifax, NS

Bachelor of Electrical and Electronics Engineering

Aug 2015 – Jul 2019

National Institute of Engineering, India

Projects

MeetFocus – Video Conferencing Platform | [GitHub](#)

2026

Java • Spring Boot • Apache Kafka • Python • Docker

- Architected a link-less video conferencing platform using **Spring Boot** microservices and a **Python** moderation service, connected through **Apache Kafka** with **Eureka** for service discovery.
- Implemented real-time meeting invitations using **WebSocket** and **Kafka**, and tested the application for **scalability** and reliability.

Triage – Autonomous Incident Response & Self-Healing Infrastructure | [GitHub](#)

2026

Python • AWS Bedrock • AWS Lambda • Terraform • Docker

- Built an AI-powered incident response system using **AWS Bedrock** to diagnose issues from **CloudWatch** logs and either fix them automatically or flag them for human review.
- Automated incident detection, diagnosis, and recovery across **10 AWS Lambda** functions using **Step Functions** and **Terraform**, cutting response time to under **120 seconds** for auto-approved fixes.

LEDGR – Finance & Bill Splitting Application | [GitHub](#)

2026

TypeScript • Next.js • React Native • PostgreSQL

- Developed a full-stack finance app with **Next.js** and **PostgreSQL**, including **22+** REST API endpoints.
- Integrated **Anthropic Claude** and **Google Cloud Vision** OCR to extract receipt items and automatically categorize expenses, protected by a kill-switch that auto-disables AI features if spending exceeds a monthly cap.

Shopizer – Open-Source Contribution, Java E-Commerce Platform | [Pull Request](#)

2026

Java • Design Patterns • Refactoring • Open Source

- Refactored a messy payment-processing module in an open-source e-commerce platform, cleaning up duplicated code and passing all quality checks with **zero** new issues.

Achievements, Certifications & Leadership

- **Certifications:** [AWS Certified AI Practitioner](#) · AWS Certified Cloud Practitioner
- **Awards:** Habitat Flagbearer Award · Winner's Circle Award, Wipro Limited
- **Leadership:** Student Representative, Dalhousie Machine Learning Society
